For Immediate Release

Central's new 40V Schottky Diode in a Tiny Leadless Package

Hauppauge, NY USA – January 23, 2008 – Central Semiconductor Corp. announces the release of the **CFSH-4** Schottky Diode in the SOD-882L Tiny Leadless Package (TLP™). The CFSH-4 is a high quality 40 Volt, 200mA Schottky Diode with an extremely fast switching speed of 5ns. Designed for applications where ultra small size with reasonable power dissipation is a prime requirement, the CFSH-4 is ideal for portable battery powered applications such as: DC-DC converters, switching circuits, and LCD backlighting. With its bottom contacts, as opposed to protruding leads, the SOD-882L TLP™ utilizes 58% less board space than the SOD-523 package, and has a maximum package profile of 0.4mm.

The CFSH-4 is available on 7" Tape & Reel. Prices start at US\$0.10 each for 3000 pieces on 7" Tape & Reel. Sample devices are available upon request.

Central Semiconductor manufactures leading edge discrete semiconductors and is always eager to explore design engineers' requests for special requirements.

Specifications for this new device can be found in the New Products / Latest Updates section of Central's website at: www.centralsemi.com/product/whatsnew/newprod/
