

CFTVS5V0BULC

5.0V, Bi-Directional Ultra Low Capacitance Transient Voltage Suppressor in the SOD-882L package

Central Semiconductor's **CFTVS5V0BULC** is an ultra low capacitance, low leakage, fast response, bi-directional TVS in the space saving SOD-882L surface mount package. This device is designed to protect sensitive equipment connected to high speed data lines against ESD damage. The low 0.35pF maximum capacitance of the CFTVS5V0BULC is an essential characteristic in preventing signal degradation.

Features

- Ultra low capacitance
- Low leakage current
- 15kV ESD protection

Applications

- High speed data line protection ideal for USB 3.1, Thunderbolt and HDMI 2.0
- User interface protection
- Charging/power port protection

Benefits

- Space saving SOD-882L package
- Data line signal integrity maintained at high speeds
